

Automation **housing & datacentre** infrastructure solutions

Little bit too hot in your datacenter?
Missing that extra power to feed your new applications?
No idea of your energy consumption?

STAY IN CONTROL OF YOUR DATACENTRE INFRASTRUCTURE. AUTOMATION OFFERS:

- / Power distribution and availability
- / Racks
- / Cooling
- / Monitoring & Management
- / Cabling and cable management
- / Fire and security.

Striving for turnkey solutions, Automation integrates piping, chillers, raised floors, gensets, camera's, etc. in its offering.

AUTOMATION GUARANTEES

- / Lower total cost of ownership thanks to energy optimized designs
- / Highest uptime thanks to availability aware set ups
- / Increased agility and ease of operations thanks to thought through concepts and modularity
- / Respect for our beloved environment.

ABOUT AUTOMATION

Automation NV, located just south of Brussels, was founded in 1961. Started as a company that automated industrial processes, it slowly but steadily evolved towards a company with two solid business units: Power Solutions and Communication Solutions.

Automation has an own production facility to allow for independence and flexibility. Moreover it can boast an own test environment and design centre.

Last but not least, a fully equipped network operating centre (NOC) provides our customers with a 24/7 maintenance service. Our target markets are mainly industry, telecom, government and healthcare.

For Government projects, Automation obtained the Class 7, P1, S1, Class 5, PZ, P3, S2 and VCA certification.

Automation employs more than 75 people and has offices in Belgium and France. The turnover is about 10 millions Euro and shows a sharp growth rate.
